

Work Experiences

Software Engineer - ConSem ICT Inc

New Taipei, Taiwan | 2020 ~

- Created a SOP for Payment Gateway Integration on Acer's Magento eStore, for the purpose of providing an easy-to-understand, and less time-consuming workflow that all RO users could follow when starting the process.
- Designed and troubleshooted RPA (Robotic Process Automation) scripts to upload all digital assets on Acer's digital asset management website in order to reduce human errors.
- Logged every asset to monitor the entire RPA progress, as well as provide log data for other uses like reports, charts, and presentations.
- Used RPA to double-check at the end of the uploading process, ensuring every asset is uploaded correctly, and contains the proper information.
- Performed SIT on the new payment process for the new CPYou Project, then used the SIT test results to validate vendor's bug fixes, present any encountered issues to the vendor.

Software Engineer - Wicresoft Japan

Tokyo, Japan | 2017 ~ 2018

- Designed and developed a prototype of the company's employee management software using Spring Framework and SVN.
- Leveraged expertise of company software by coaching coworkers on Spring Framework to speed up the workload.
- Developed a new software feature from scratch for client's POS(Point of Sale) device in order to increase business opportunities.
- Collaborated with the team in a scrum environment efficiently as well as documented meeting minutes to keep in record.

Software Engineer - Wistron ITS

Taipei, Taiwan | 2016 ~ 2017

- Served as a client facing lead in every scrum cycle meeting via Skype with the project manager in Canada.
- Reported bugs or issues on Jira for bookkeeping and wrote a basic manual for new coworkers on how to use Jira.
- Expanded client's reach to more customers by adding French localization to client's android IOT app.
- Optimized client's app user interface by reformatting the android xml layouts to be more user-friendly.
- Volunteered to fix bugs and create Python scripts to automate tests due to a large amount of test cases.
